## Discharge Sheet

Pet's Name \_\_\_\_\_

Procedure Performed \_\_\_\_\_

Name Of Surgeon \_\_\_\_\_

### Medication

Drug	Dose	Frequency	When To Start	Duration

### Follow up Appointments

Days after Surgery	Date	Time	Reason

Following orthopaedic surgery, your pet should begin putting his/her foot to the floor within 7 days, and weight bearing well by 2 weeks after surgery. Almost full weight bearing should be apparent by 4 weeks after surgery. If your pet is not making this kind of progress, please contact your clinic to arrange an appointment for assessment.

**IF YOUR PET BECOMES OBVIOUSLY LAME AFTER SEEMING TO MAKE GOOD PROGRESS, PLEASE SEEK IMMEDIATE ATTENTION**

Any other specific recommendations

Please see our website for further information on the surgery that your patient has had today.
